PROFESSIONAL SUMMARY

Backend Software Engineer with 4+ years of experience in Java, Spring Boot and SQL, working on high-volume data ingestion (400K+ requests/day), multithreaded bulk-processing frameworks, and production systems on AWS and Kubernetes. Strong in concurrency, performance tuning, and root-causing issues in live distributed systems.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate

Cloud & Infrastructure: AWS (EC2, RDS, S3, SQS, SNS), Google Cloud Platform (GCP), Docker, Kubernetes, Argo Workflows, CI/CD, Jenkins, Prometheus, Grafana

Databases: MySQL, ClickHouse

Core Concepts: Microservices, RESTful APIs, Distributed Systems, Multithreading, Data Structures & Algorithms, Object-Oriented Design

PROFESSIONAL EXPERIENCE

HighRadius Technologies Pvt. Ltd.

Hyderabad, Telangana

Software Engineer (Technical Consultant II)

Jan. 2026 - Sep. 2026

- **Built a full-stack Promise to Pay (P2P) workflow** for Credit Note processing using Java, JavaScript and SQL, giving enterprise ledgers 100% traceability and streamlining account reconciliation.
- **Co-developed a common bulk file upload framework** in which a single upload flow drives multiple bulk functionalities (disputes, notes, deductions, invoice parameters), using multithreaded batch processing, S3 storage and shared date/amount-format utilities.
- **Maintained a 99% uptime SLA** across multi-cloud infrastructure (AWS, GCP, Azure) using Prometheus and Grafana, debugging issues before they became client-reported outages.
- **Migrated Java processes from AWS VMs to containerised Kubernetes pods** using Docker and Argo Workflows, improving scalability, deployment speed and resource utilisation, and achieving a 40% reduction in infra cost.

Software Engineer (Technical Consultant I)

Jan. 2025 - Dec. 2025

- **Resolved a millisecond-level concurrency race condition** in Java data-ingestion agents, guaranteeing 100% data accuracy for Microsoft Graph API pipelines handling 400,000+ requests daily per client.
- **Tuned Java thread-pool configuration and execution concurrency** in large-scale data-loading pipelines, eliminating database lock-wait timeouts and improving batch processing latency.
- **Stabilised machine learning execution pipelines** by resolving cloud-storage and third-party API integration bottlenecks, restoring Generative AI job completion rates to 100%.
- **Eliminated client issues** by providing technical solutions to their business requirements for the Collections Product module, improving customer satisfaction.

Software Engineer (Associate Technical Consultant II)

Jan. 2024 - Dec. 2024

- **Engineered backend microservices** using Java and Spring Boot, increasing overall system throughput by 25% and reducing API latency by 15%.
- **Developed internal diagnostic tooling** in Java to automate recurring configuration investigations, reducing support-ticket volume by 25% and saving 8 hours weekly of manual analysis.
- **Fixed Hibernate ORM entity-mapping failures** and thread-management bottlenecks, preventing recurring background job failures and restoring data consistency.

Associate Data Analyst I & II (Data / Analytics Engineering)

July 2022 - Dec. 2023

- **Built automated Python and SQL data pipelines** for recurring reporting workflows, reducing manual data-preparation effort by 50%.
- **Optimised relational database queries and redesigned backend calculation models**, cutting query execution time by 20% and processing time by 35%.
- **Authored generic SQL stored procedures** to automatically remediate database corruption caused by invalid payloads, reducing related support tickets by 15% quarterly.

Machine Learning Intern

April 2021 - June 2022

- **Developed multi-model regression algorithms** for invoice payment prediction for a major enterprise client (Unilever), reducing Days Sales Outstanding (DSO) by 15%.
- **Built data preprocessing pipelines** on AWS EC2 for big data analysis, leading technical execution with minimal mentorship and improving model accuracy by 10%.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar

July 2018 - June 2022

Bachelor of Technology in Computer Science & System Design

CGPA: 9.0

AWARDS & ACHIEVEMENTS

Annual Award - Highflyer, 2025

Award of Applause - Highflyer Q2, 2024

Award of Applause - Highflyer H1, 2023

Team of the Year - Highflyer, 2021

Star Team Award - Highflyer Q3, 2021
