

MANISH RANJAN BEHERA

+91 8602747194 | manish12042000@gmail.com | linkedin.com/in/manishranjanbehera | github.com/MrBlu1204

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable backend microservices, distributed data pipelines, and cloud infrastructure (Java, Spring Boot, JavaScript, AWS). Proven track record of optimising system performance, resolving concurrency bottlenecks, and maintaining 99% uptime SLAs.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL
Frameworks & Libraries: Spring Boot, Spring MVC, Hibernate
Cloud & Infrastructure: AWS (EC2, RDS, SQS, SNS), Google Cloud Platform (GCP), CI/CD, Prometheus, Grafana
Databases & Search: MySQL, ClickHouse
Architecture & Core Concepts: Microservices, RESTful APIs, Distributed Systems, Multithreading, Data Structures & Algorithms, Object-Oriented Design

PROFESSIONAL EXPERIENCE

- HighRadius Technologies Pvt. Ltd.

Hyderabad, Telangana

Technical Consultant II (Software Engineer)

Jan. 2026 - Present

 - Design and deploy a full-stack** financial reconciliation service using Java, JavaScript and SQL, automating Credit Note processing and achieving 100% traceability for enterprise ledgers.
 - Harden enterprise authentication workflows** by resolving Java controller and SMTP integration failures, restoring reliable One-Time Code (OTC) delivery for password resets impacting 15% of the enterprise client base.
 - Monitor and debug** multi-cloud infrastructure (AWS, GCP, Azure) utilising Prometheus and Grafana, maintaining a strict 99% uptime SLA and preventing critical client-reported outages.
 - Enhance Identity and Access Management (IAM) reliability** across multi-tenant environments by remediating database mapping defects in core backend services, eliminating arbitrary session terminations.
- Technical Consultant I (Software Engineer)

Jan. 2025 - Dec. 2025

 - Optimized large-scale ETL pipelines** by tuning Java thread-pool configurations and execution concurrency, eliminating database lock-wait timeouts and reducing batch processing latency by 10%.
 - Resolved a millisecond-level concurrency race condition** in Java data-ingestion agents, guaranteeing 100% data accuracy for Microsoft Graph API pipelines handling up to 400,000+ requests daily per client.
 - Stabilized machine learning execution pipelines** by resolving cloud-storage and third-party API integration bottlenecks, successfully restoring Generative AI job completion rates to 100%.
- Associate Technical Consultant II (Software Engineer)

Jan. 2024 - Dec. 2024

 - Engineered scalable backend microservices** using Java and Spring Boot, successfully increasing overall system throughput by 25% and reducing API latency by 15%.
 - Developed internal diagnostic tooling** using Java to automate recurring configuration investigations, reducing support-ticket volume by 25% and saving 8 hours weekly of manual analysis.
 - Diagnosed and eliminated complex Hibernate ORM entity-mapping failures** and thread-management bottlenecks, preventing recurring background job failures and restoring data consistency.
- Associate Data Analyst I & II (Data / Analytics Engineering)

July 2022 - Dec. 2023

 - Built and deployed automated Python and SQL data pipelines** for recurring reporting workflows, reducing manual data-preparation effort by 50%.
 - Streamlined relational database queries and redesigned backend calculation models**, cutting query execution time by 20% and processing time by 35%.
 - Authored generic SQL stored procedures** to automatically remediate system-wide database corruption caused by invalid payloads, reducing related support ticket volume by 15% quarterly.
- Machine Learning Intern

April 2021 - June 2022

 - Spearheaded the development of complex, multi-model regression algorithms** for invoice payment predictions for a major enterprise client (Unilever), successfully reducing Days Sales Outstanding (DSO) by 15%.
 - Designed and implemented robust data preprocessing pipelines** using AWS EC2 for big data analysis, independently leading technical execution with minimal mentorship to improve overall model accuracy by 10%.
 - Researched and established foundational data analytics metrics** for a new Deduction module, setting up the tracking infrastructure for future product features.

EDUCATION

Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar
Bachelor of Technology in Computer Science & System Design
July 2018 - June 2022
CGPA: 9.0

AWARDS & ACHIEVEMENTS

Annual Award - Highflyer, 2025
Award of Applause - Highflyer Q2, 2024
Award of Applause - Highflyer H1, 2023
Team of the Year - Highflyer, 2021
Star Team Award - Highflyer Q3, 2021
